COR-0320

Copy 1 of 3

16 January 1959

MEMORANDUM FOR THE RECORD

SUBJECT : Registration of ITEK Stock with the Securities
and Exchange Commission

1. On 16 January 1959, [] of ITEK called [] and the undersigned. He stated that ITEK was attempting to list their stock with the SEC and one of the requirements was that their Registration Statement contain a list and description of all contracts in their house. Because of security reasons he was seeking guidance on how they would show their subcontract with LAC/MSD under Contract []

2. Normally, when registering with SEC, the list of contracts is in two parts, (a) Commercial or unclassified Government Contracts and (b) Classified Government Contracts. Usually, a certification from the Contracting Officer is made to the effect that the Contractor does hold a classified contract with a particular Agency or Department and states the dollar amount. Because of security reasons this was not possible in this instance. However, it was agreed that [] would be contacted to determine if he would send a letter to this effect.

3. [] was contacted by the undersigned and was given the contents of the attached draft. He agreed to prepare the letter on Air Materiel Command stationery and forward the letter to ITEK who would make it a part of their Registration Statement. It is felt that by this procedure ITEK will be able to report all of their contracts as required by law and Project CORONA security will not be jeopardized.
